

Story Extension Activities to Enhance the Reading Experience

Extension activities are a great way to take reading to a new level and create multi-dimensional reading experiences. Through relevant activities, children's multiple senses are used, memory recall of story plot and vocabulary are strengthened, discussions are encouraged and thinking is inspired. In this workshop, parents will learn how to approach picture books through different angles to fulfil their child's potential.

Why Story Extension Activities?

Research has proven that children benefit from revisiting a book that they are familiar with. Besides repetitive read-alouds, extension activities can make stories come alive and bring new layers and dimensions to the reading experiences. Diving into stories through activities can create authentic learning experiences, and build precious memories for the whole family.

What you get:

The course is divided into 2 x 2 hour sessions. In the first session, participants are introduced to a wide range of extension activities based on picture books, arts and crafts, language, games, food, and so on. In the second session, participants will experience and practice how to approach one picture book from different angles.

To request more details, please contact Yvonne Leung at yvonne@bringmeabook.org.hk

Language:
